TOGETHER WITH SOME

GENERAL OBSERVATIONS,

AND AN

INDEX.

LONDON:

PRINTED BY T. WILKINS, ALDERMANBURY.

AND SOLD BY THE AUTHOR, PATERNOSTER ROW; AND AT NO. 250, OXFORD-STREET.

Price Two Shillings in Boards.

Entered at Stationers Hall.

ADVERTISEMENT

TO THE READER.

THE Compiler of the following ſheets was induced to undertake the taſk, to avoid the conſtant trouble he was at in tranſcribing ſingle Receits for one or other of his friends. He thought it might be more uſeful to make a ſmall cheap ſelection of Receits moſt generally needful; he has endeavoured to ſelect ſuch as are ſimple in their compoſition and effectual for the purpoſes intended; and as he is no friend to blindly following printed or written forms, he has generally choſen ſuch as will admit of eaſy modification, according to the exiſting circumſtances. He has printed it in a ſize proper to bind up as a pocket-book, or in any other way ſuitable to the poſſeſſor;—he has

not made any animadverſions on the Receits as they go on, becauſe he wiſhes to leave them to every man's own judgment; but has thought fit to add ſome General Obſervations on the compoſition and probable effect of the different medicines. He has likewiſe added an Index, that every claſs may be readily recurred to, and if the publication is received by the great body of the perſons, for whoſe uſe it is intended, half ſo favourably as it has been by his particular friends, the Compiler will be amply repaid for his trouble.

A MANUAL, &c.

PURGING BALLS.

1. BEST Barbadoes Aloes one ounce.
Powder of Jalap two drams.
Powder of Cream of Tartar two drams.
Powder of Ginger two drams.
Oil of Aniſeeds forty drops. (a ball.

Mezerean Root two drams.
Crude Antimony (tied in a rag) four ounces
Boil in three quarts of Water to two quarts.
Give one pint twice a Day.

254 12. Gentian Root three ounces.
Orange Peel three ounces.
Chamomile Flowers three ounces.
Pomegranate Shell one ounce.
Winter's Bark one ounce.
Ginger half an ounce.
Infuſe for three Days in three quarts of Strong Beer and give one pint every Morning.

255. 13. Prepared Chalk one ounce.
Venice Treacle two ounces.
Powder of Columbo Root two drams.
Liquid Laudanum two drams.
Water Gruel one pint.
Red Wine half a pint.
Mix and give twice a Day.

256. 14. Carraway ſeeds bruiſed one ounce.
Sweet Fennel-ſeeds bruiſed one ounce.
Aniſeeds bruiſed one ounce.
Ginger half an ounce.
Pimento half an ounce.
Boil in one pint and half of Water-Gruel for ten Minutes.

Powder

257. 15. Powder of Turmeric one ounce.
Powder of Aniſeeds one ounce
Powder of Fenugreek ſeeds one ounce.
Powder of Grains of Paradiſe half an ounce.
Mix them and give in a pint of warm Ale.

258. 16. Powder of Turmeric one ounce & half.
Powder of Nitre one ounce.
Powder of Ginger half an ounce.
Emetic Tartar two drams.
Mix them and give in a pint of warm Ale.

259. 17 Onions cut very ſmall, four ounces.
Strong Beer one quart. (hours.
Give one half warm and repeat in ſix

260. 18. Garlic one ounce.
Venice Treacle two ounces.
Mix them well in a Mortar, then add,
White Wine one pint.
Give it cold.

Aniſeeds

261. 19. Aniſeeds bruiſed half a pound.
Boil them in a quart of Ale, a few Minutes, then diſſolve half a pound of Honey in it, and give it blood warm, ſeeds and all.

262. 20. Barbadoes Tar two ounces.
Cold drawn Linſeed Oil half a pint.
Water Gruel one pint.
MIX.

263. 21. Powder of Bay Berries one ounce.
Powder of Grains of Paradiſe half an ounce.
Powder of Nitre two ounces.
Oil of Turpentine half an ounce.
Mild Ale one quart.
MIX.

264. 22. Controyerva Root bruiſed one ounce.
Snake Root bruiſed one ounce.
Liquorice Root ſliced one ounce.
Saffron two drams.
Infuſe for two hours, in two quarts of boiling water then ſtrain and add diſtilled Vinegar four ounces.
Give one pint every ſix hours.

Camphor

265. 23. Camphor in Powder one dram.
Diſtilled Vinegar (warm) half a pint.
Mix and give every ſix hours.

266. 24. Valerian Root bruiſed two ounces.
Snake Root bruiſed one ounce.
Infuſe in one quart of boiling water till cold, then add Liquid Laudanum half an ounce.
Mix and give one half and repeat in ſix hours.

EMBROCATIONS.

267. 1. Common Oil of Amber two ounces.
Opodeldoc ſix ounces.
Spirit of Sal Armoniac two ounces.
Barbadoes Tar two ounces.

268. 2. Common Oil of Amber one ounce.
Oil of Vitriol two ounces.
Oil of Turpentine two ounces.
Common Linſeed Oil twelve ounces.

Mix

Mix the two laſt together, in a pipkin, then with a ſtick, ſtir in the Oil of Vitriol very gradually: afterwards add the other.

MIX.

269. 3. Oil of Turpentine four ounces.
Oil of Bays four ounces.
Palm Oil two ounces.

MIX.

270. 4. Spirit of Wine and Camphor fourounces
Spirit of Sal Armoniac two ounces.
Spirit of Turpentine two ounces.

CONSUMPTIONS.

271. 1. Gum Aſſafœtida four ounces.
Gum Ammoniac four ounces.
Gum Styrax (ſtrained) four ounces.
Freſh Squills four ounces. (ounces.
Cinnabar of Antimony (levigated) two
Honey ſufficient to make a Maſs.

Cinabar

272. 2. Powder of Nitre four ounces.
Powder of Gum Guaicum four ounces.
Cinnabar of Antimony (levigated) four ounces.
Powder of Grains of Paradiſe two ounces.
Honey ſufficient to make a Maſs.

273. 3. Conſerve of Hips half a pound.
Locatelli's Balſam half a pound.
Powder of Bayberries four ounces.
Flower of Sulphur four ounces.
Treacle ſufficient to make a Maſs.

274. 4. Garlic half a pound.
Powder of Fenugreek Seeds half a pound.
Powder of Grains of Paradiſe two ounces.
Honey ſufficient to make a Maſs.

FOR A SORE THROAT.

275. 1. Camphor in Powder two drams.
Opium in Powder half a dram.

Venice Treacle one ounce and a half.
Mix into a Ball.

276. 2. Powder of Sal Polychreſt one ounce.
Powder of Jalap ſix drams.
Powder of Fenugreek Seeds half an ounce.
Common Treacle ſufficient to make a Ball.

FOR WORMS.

277. 1. Barbadoes Aloes three ounces.
Calomel (levigated) one ounce.
Powder of Ginger one ounce.
Oil of Aniſeeds three drams.
Treacle ſufficient to make four Balls.
One to be given every other Night.

278. 2. Levigated Antimony half a pound.
Æthiop's Mineral four ounces.
Powder of Aniſeeds half a pound.
Honey ſufficient to make eight Balls.
One to be given every Night.

Powder

279. 3. Powder of Tin one ounce.
Æthiops Mineral half an ounce.
Powder of Aniſeeds half an ounce.
Honey ſufficient to make a Ball.

280. 4. Calomel (levigated) half an ounce.
Powder of Tin two ounces.
Powder of Diapente ten ounces.
Common Oil of Amber one ounce.
Oil of Savin two drams.
Treacle ſufficient to make eight Balls.

GENERAL OBSERVATIONS.

I thought a few General Obſervations upon the method of compounding and probable effects of the foregoing remedies would be acceptable, and for that purpoſe have prefixed two columns of figures; the firſt contains the number of Receits progreſſively from the firſt to the laſt—the ſecond column contains the numbers of the receits under each particular head—it is the firſt column I ſhall here make uſe of. I have not made uſe of any figures in the Receits themſelves, for fear of errors in quantity.

The firſt fourteen numbers are varieties of Purging Balls, No. 1, is moſt generally uſeful, which is principally the caſe throughout; the three next are Com-

mon Purges:—No. 5 and 9, are Stomachic Purges fit for very tender horſes, or after a ſevere fit of illneſs; the reſt are Phyſic of different ſtrengths—No. 12, is very powerful.—No. 13 and 14, are for Horſes at Graſs. I have directed all theſe Balls to be beat up in a Mortar, but ſeveral of them may be made by melting the Aloes in a Ladle, with a ſmall quantity of Spirits, and then ſtirring in the other Ingredients; but I prefer the former method.

The next twelve are Cordial Balls.—No. 15, is Dr. Bracken's, a compoſition, which, for general purpoſes, cannot be excelled:— the reſt are Compounds, which are intended to anſwer the ſame end, with ſome little deviation; the laſt, No. 26, is the leaſt judicious.

For Diuretic Balls there are twelve Receits. No. 27, is a good Compoſition.

No.

No. 28, will not keep long on account of the Diuretic Salt —No. 35, 36, and 37, are very ſtrong. The Doſe of Diuretic and Cordial Balls is generally two ounces.

No. 39, 40, and 41, are Mercurial Balls frequently given in the Farcy, Mange, and other obſtinate Diſorders of the Juices, they are powerful remedies, and great care muſt be taken of the horſe, during their operation; he muſt have warm Water or Watergruel, and muſt be warmly cloathed.—No. 39, is the mildeſt. No. 41, is a very ſtrong Purge.

The next ten numbers are for Fevers, No. 42, is a very good Ball, and given after Bleeding, &c. in inflammatory Fevers, and violent Colds will ſeldom fail being of great ſervice, accompanied with Maſhes; the next five are

good

good Medicines, intended for the ſame uſe—The remaining four are warm Medicines, proper for Putrid Diſorders, and ſhould be accompanied with Bark, Red Wine, &c. they ſhould be given about every ſix hours.

Then follow Balls for that troubleſome Diſorder the Greaſe.—No. 54, is far the beſt, but as theſe Medicines muſt be given a conſiderable time, it is too expenſive for ordinary Cattle—a Ball of any of them ſhould be given Night and Morning for three Weeks or a Month.

No. 56, is a Ball commonly given to Hunters every Night for three Weeks, or a Month, before the ſeaſon commences, in order to ſtrength their Wind.

No. 57, 58, 59, are Alterative Balls, proper to be given when Horſes are changing their coats, or when they are troubled with any little eruptions. They ſhould

be

be given Night and Morning for ſome time. Balls are much the beſt method of giving theſe medicines, as in giving them in Powder, mixt with the Feed, there is a great deal waſted.

There are ten Receits for Bliſters, all of which are uſeful, and may be ſelected according to their ſtrength, and the purpoſes they are intended to anſwer.

Poultices, which come next, may be divided into two claſſes, Drawing and Repellent; No, 70, 71, 72, 73, 74, 75, are of the former deſcription, 76 and 77, of the latter—No. 73, though very troubleſome to compound, is an excellent emollient and ripening Poultice.

Mixt Oils are uſed for Strains, Bruiſes, &c. externally, they ſhould be well rub'd on the part hurt, three or four times a day.

Of the Heel Ointments, No. 86, is emollient and healing, ſo is No. 92, the reſt are all drying, 90 and 93, powerfully ſo.

No. 96 and 97, are very uſeful Ointments when Horſes Hoofs become dry and crack; they ſhould be well rub'd in every day.

The Ointments which follow are intended for Wounds, Sores, &c. No. 98, is very generally uſeful, as cleanſing and healing; 105, 106, 108, are gently drawing; 107 is very drying, and 109, is uſeful when Fungus or Proud-fleſh appears.

Sharp Waters are uſeful in the firſt appearance of the Greaſe or Humours about the Heels or Fetlocks; they ſhould be waſh'd with them two or three times a day; No. 111 is far the ſtrongeſt.

The Mange is a very troubleſome Diſorder, and requires a great deal of care and attention to cure it; ſome of theſe Ointments muſt be uſed every day, and the Alterative Balls, No. 57, ſhould be given every night.

No. 118, is an emollient Clyſter, proper to be adminiſtered when a Horſe is bound in his Body; the next is for the ſame intention, but it is much warmer, ſo are No. 121, and 122, the laſt is very purgative.—No. 120, is a powerful aſtringent one, to be given in Scourings and great weakneſs of the Inteſtines.—No. 123, is merely nutritive and intended to ſupport a Horſe ſome little time, when by reaſon of a Lock'd Jaw, or other Diſorders, he cannot take his Food.

The Farcy is a very difficult Diſorder to cure, and requires conſtant care and attention, as well as Medicines both internal and external.—No. 124, is a Diet Drink for purifying the Blood and Juices, and ſhould be perſevered in for a Month or longer.—No. 125, and 128, are compoſitions to dreſs the Buds,

the reſt are internal Remedies, and ſhould be given daily.

The Receits for Spavins, Splents, &c. are all Cauſtics, and muſt be uſed diſcretionally according to their different ſtrengths.

No. 138, for a Sand-crack, muſt be uſed immediately after mixing, by filling the Crack with it; it requires no farther trouble.

The Balls which follow, are very good Remedies in old obſtinate Coughs, particularly in 1 9. There muſt a Ball be given every night and morning for ſome time.—The Drinks have their Directions annexed.

No. 144, is an aſtringent Fomentation for Windgalls, and the next is a Charge, to be applied when the ſwelling has ſubſided.

The

The Mixtures for Strains, are to be rub'd in with the hand, on the part affected three or four times a day.

Eye Waters are very uſeful in Colds and Inflammations of the Eyes, to which Horſes are very ſubject. No. 154, 156, 157, are very mild; No. 155 is ſharp, and muſt be uſed when there is a great defluxion.

The Balls for Surfeits are excellent Medicines, not only in that Diſorder, but in all eruptions and foulneſs of the Skin, No. 160 is particularly ſo.

The Gripes is a Diſorder which requires ſpeedy Relief, all the Medicines for it are warm and carminative. No. 165, 166, generally relieves in half an hour.

The Ointment for the Mallenders are merely to be rubbed upon them twice a day.

Diabetes,

Diabetes, or immoderate Staling and Piſſing Blood, are very dangerous Diſorders, and muſt be checked as ſoon as poſſible. No. 171 and 172, are mild balſamic Medicines. No. 173, is a powerful aſtringent, and muſt be uſed with great caution.

No. 174, is to be rubed well on the Hoofs Night and Morning.

Alteratives are a very uſeful claſs of Medicines to Horſes kept in Stables, they ſhould be given every Spring and Autumn for a Fortnight or three Weeks one table-ſpoonful in their Feeds every Night.—No. 176, is an excellent Medicine.

The Glanders is a Diſorder ſeldom curable, I never knew but one Horſe cured of a confirmed Glanders, and that was by a two years daily perſeverance

rance in adminiſtering Medicine, a trouble few Perſons will ſubmit to, No. 183 is far the beſt Remedy.

The Staggers are ſeldom fatal, if taken in time, they are ſomewhat analogous to the apoplexy in Men; Bleeding ſhould always precede the exhibition of any Medicine.

The next ſix Receits are for Broken Wind, but I muſt obſerve it is a Diſeaſe ſeldom cured—No. 192, 193, 194, 195, are very good Balſamic Medicines, and will do whatever can be done in this complaint.

The Yellows or Jaundice, is a common and very troubleſome Diſorder among Horſes. They ſhould have gentle exerciſe, and a Ball ſhould be given Night and Morning, No. 204, 205, 206, are the beſt Remedies.

Stran-

Stranguary is a very troubleſome and dangerous Complaint; the common Diuretic Medicines are too harſh and violent, the Receits here given are mild and aperient. In this Diſeaſe the Horſe ſhould have plenty of thick Watergruel.

The Pectoral Balls which follow, if given in time, will prevent a Horſe becoming Broken Winded; No. 214, 215, are excellent Remedies.

After a Horſe has been over-purged, or has a ſcouring brought on by green Meat, &c. the Reſtringent Balls are extremely ſerviceable, but you muſt take care not to continue them longer than abſolutely neceſſary, for fear of producing a worſe Diſorder than they are intended to cure.

When a Horſe loaths his Food, without any apparent Diſorder, the Balls

No.

No. 219, will generally reſtore his appetite, 220 and 221, are other Compoſitions for the ſame purpoſe.

The Sallenders are almoſt ſynonimous with the Mallenders, as I thought I had not been ſufficiently copious under that head I have added a few more Receits here.

After hard Exerciſe or acute Diſeaſe, if a Horſe ſhould not regain his ſtrength ſo faſt as expected, the Balls No. 227 and 228, are very good remedies, and will reſtore him ſpeedily.

The Medicines which follow for the Canker, are for the Feet or Mouth, No. 229, 230, 233, and 234, are for the Feet, to be applied twice a day. No. 251 and 252, are for the Mouth, and ſhould be uſed three or four times a day.

Horſes being very ſubject to Inflammations in the Eyes, theſe Ointments are very uſeful, No. 237, is Sir Han Sloane's famous Ointment, but it does not appear to me to be more efficacious than the reſt.

Fomentations are very ſerviceable in all Tumours and Swelling, that do not ſhew ſigns of ſuppuration, but wherever they do, it ſhould be encouraged.

The Drinks which follow, are calculated to be given for different Complaints, inſtead of Balls, where there is any reaſon for prefering the former. No. 243 is an Alterative Drink, and ſhould be continued for a month or more. No. 244 and 245, are Diuretic Drinks—246 is a Purging one—247, 248, 252, 255, are Reſtringent Drinks, and very ſerviceable after a ſtrong doſe of

of Phyſic, Scouring, &c. No. 249, 256, 257, 259, 280, 261, and 262, are all good in Coughs, Colds, and after hard work—250, and 251 are gentle Purgatives—253 is an excellent Alterative Drink in all Foulneſs of the Blood and Juices—No. 254 and 256, are Stomachic Drinks, uſeful in Loſs of Appetite and Weakneſs of Digeſtion; the reſt are all Drinks uſed in Fevers—265 is particularly good when the head ſeems much affected.

The Embrocations are of ſervice in ſlight Bruiſes and Strains. They ſhould be well rub'd in with the hand three or four times a day.

Conſumption, properly ſo called, is a Diſorder ſo ſeldom curable, that it would be uſeleſs to order Medicines for it; the partial waſting of the Fleſh,

which generally goes under that name, will be remedied by theſe Medicines.

The Balls for ſore Throats, are to be given two or three times a day.

The Worm Balls are gentle, and may be uſed without taking a Horſe off his Work.
